

May Financial Performance Analysis

Finance / FP&A dataset · 1,152 rows

Stable total actual indicates consistent financial health despite minor declines.

- Total actual remains steady at \$517k, reflecting stability.
- Sales leads departments at \$149k, contributing 28.8% of total actual.
- Sales experienced a decline of -\$5k compared to the prior month.
- Salaries & Wages dominate at \$231k, making up 44.8% of total actual.
- Salaries & Wages decreased by -\$2k from the previous month.

Actual remained stable at \$517k in 2026-05, matching April's performance.

In May 2026, actual totaled \$517k, consistent with April's figure of \$517k, reflecting a slight decrease of -0.1%. The recent trend shows a peak month of \$530k in February 2026, followed by a gradual decline to the current level. This stability indicates a potential seasonal pattern as we approach the mid-year mark.

KEY TAKEAWAY

Maintaining \$517k suggests resilience in performance despite recent fluctuations.

- Actual in May 2026 is \$517k, unchanged from April 2026.
- The peak month was \$530k in February 2026.
- Monthly actuals show fluctuations but overall stability in recent months.

DEPARTMENT BREAKDOWN

Sales leads with \$149k, while Customer Success grows by \$3k versus last period.

\$149k

Sales: \$149k, 28.8% of total spend

\$103k

Customer Success: +\$3k growth

\$79k

R&D and Sales both declined from prior period

CATEGORY BREAKDOWN

Salaries & Wages at \$231k dominate, while Software & Cloud increased by \$2k.

In May 2026, Salaries & Wages lead with \$231k, representing 44.8% of total spend. Software & Cloud saw the largest increase, rising by \$2k to \$94k, indicating a growing investment in technology. Other categories such as Contractors and Travel & Events remain significant but show less concentration compared to the top two categories.

Source: dim_category: actual by category (2026-05), verified against the data.

KEY TAKEAWAY

Focusing on Salaries & Wages and Software & Cloud will drive strategic resource allocation.

- Salaries & Wages account for nearly half of total spend at \$231k.
- Software & Cloud is the biggest mover, increasing by \$2k to \$94k.
- Overall spend remains concentrated in a few key categories.

Priorities for the coming month

1. Analyze Sales performance to identify drivers behind the \$5k decline and implement corrective actions.
2. Review Salaries & Wages expenditures to optimize costs and address the \$2k decrease.
3. Enhance sales training programs to boost productivity and recover the \$5k loss in Sales.
4. Reallocate resources from underperforming areas to support Sales and improve overall financial performance.
